National Biomechanics Day
April 7th, 2016

National Biomechanics Day will be the 1st nation-wide Biomechanics event. In conjunction with the American Society of Biomechanics and many other Biomechanics Labs across the country, Boise State University’s Center for Orthopaedic & Biomechanics Research (COBR) will demonstrating how Biomechanics is used to better understand our world, as well as the impact it has on health and well-being. Through an agenda of activities involving force platforms, motion capture, EMG, and other biomechanical tools we invite you to come see COBR’s individual and unique Biomechanics skills and capabilities.

Open House: 4 PM – 6 PM
Technology Demo: 4:30PM – 5:30PM

Please RSVP using the link below.
